Tap **Take Photo** to use your camera or **Gallery** to upload an existing picture.

Scroll through the **Design Features** menu to customize the project requirements:

- Pool Layout:** Choose a shape (e.g., Freeform or Rectangular) and specify its location, orientation, size, and deck material.
Spa: Select if you want an Attached, Raised, or Detached spa.
Water Features: Add elements like natural waterfalls or sheer descents.
Hardscapes & Lighting: Choose features such as fire pits, or outdoor kitchens
Landscaping: Select plant types (e.g., Palm Trees) and their density.
Pool Entry & Recreation: Add steps, slides, or diving boards.
Generate Design Tap at the bottom of the screen.
Review the Design Result by toggling between the **Before** and **After** views.
- Share.** To send the design to your client, tap **Share**.
 A confirmation will appear stating the design has been sent via email or SMS.
